- **Practice Manuals** are aimed at providing additional guidance to professional accountants in performing audit & other related assignments.
- **Studies & other papers** are aimed at promoting discussion or debate or creating awareness on issues relating to quality control, auditing, assurance & related service, affecting the profession.
- Technical Guides, Practice Manuals and Other Papers are issued by AASB directly.

### **Procedure for Issuing SAs**

- AASB determines the broad areas in which the SAs need to be formulated.
- AASB is assisted by Study Groups
- Study Groups prepares an exposure draft of the proposed SA and issued for comments by members of the Institute.
- Based on comments received, the SA is finalised by the AASB and submitted to the Council of the Institute.
- SA is then issued under authority of Council.

## SA 200 - Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with SAs

### Sufficient Appropriate Audit Evidence and Audit Risk

- To obtain reasonable assurance, the auditor shall obtain **sufficient appropriate** audit evidence to reduce audit risk to an acceptably low level.
- "Audit risk" is the risk that auditor gives inappropriate audit opinion when FS are materially misstated.
  - a) Inherent risk
  - b) Control risk
  - c) Detection risk
- An **auditor cannot obtain absolute assurance** because of inherent limitations of an audit. These are:
  - a) The Nature of Financial Reporting – involves judgment,
  - b) The Nature of Audit Procedures – NOT designed to catch carefully designed frauds,
  - c) Timeliness of Financial Reporting and the Balance between Benefit and Cost and
  - d) Other Matters – non-compliance of laws and regulations, existence and completeness of related party transactions difficult to understand.
- **The auditor should obtain sufficient appropriate audit evidence through the performance of compliance and substantive procedures.**

**Compliance procedures** are tests designed to obtain reasonable assurance that those internal controls on which audit reliance is to be placed are in effect.

**Substantive procedures** are designed to obtain evidence as to the completeness, accuracy and validity of the data produced by the accounting system.

They are of two types:

  - a) Tests of details of transactions and balances;
  - b) Analytical Procedures

### Conduct of an Audit in Accordance with SAs

#### Complying with SAs Relevant to the Audit

The auditor shall comply with all SAs relevant to the audit.

#### Objectives Stated in Individual SAs

To achieve the overall objectives of the auditor, the auditor shall use the objectives stated in relevant SAs in planning and performing the audit

#### Complying with Relevant Requirements

The auditor shall comply with each requirement of an SA unless, in the circumstances of the audit:

- a) The entire SA is not relevant; or
- b) The requirement is not relevant because it is conditional and the condition does not exist.

**In exceptional circumstances, the auditor may judge it necessary to depart from a relevant requirement in an SA.** In such circumstances, the auditor shall perform alternative audit procedures to achieve the aim of that requirement.

#### Failure to Achieve an Objective

Modify the auditor's opinion or withdraw from the engagement.

## SA 320 - Materiality in Planning and Performing an Audit

### Introduction and Objective

- Information is material if its misstatement (i.e., omission or erroneous statement) could influence the economic decisions of users of financial information.
- Materiality should be considered by the auditor when:
  - a) Determining the nature, timing and extent of audit procedures;
  - b) Evaluating the effect of misstatements.
- Whether the **particular information/item is material can be judged from:-**
  - a) Its size/amount.
  - b) Its nature (Eg. abnormal, non-recurring, extraordinary etc.).
  - c) Its legal requirements (Eg. Securities premium used for payment of dividend).
  - d) Its qualitative materiality (Eg. Fraud committed by managing director of small amount).
  - e) The auditor needs to consider the possibility of misstatements of relatively small amounts that, cumulatively, could have a material effect on the financial information. (Eg. An error of Rs. 10 in calculation of monthly interest in each savings account by Bank).
- The auditor's determination of materiality is a matter of professional judgment.
- There is inverse relationship between materiality and audit risk. It is because if the transaction is material then surely it must have been considered by the auditor during the process of audit and there is very less chance of having frauds and errors contained within such transactions.

### Requirements

**Determining Materiality and Performance Materiality** – for financial statements as a whole as well as assertion level(s).

**Performance materiality means the amount or amounts set by the auditor at less than materiality level** to reduce the detection risk to an acceptably lower level. It is determined for both financial statements as a whole as well as assertion level(s).

#### Revision as the Audit Progresses:

The auditor shall revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) in the event of becoming aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially.

#### Audit Benchmark:

A percentage is often applied to a chosen benchmark as a starting point in determining materiality for the Financial Statements as a whole.

Factors affecting identification of an appropriate Benchmark:

- a) The elements of the Financial Statements (for example, Assets, Liabilities, Equity, Revenue, Expenses)
- b) Items on the Financial Statements in which the users focus.
- c) The Nature of the Entity, its life cycle and the industry and economic environment in which the Entity operates;
- d) The Entity's ownership structure and the way it is financed (for example, if an Entity is financed solely by Debt rather than Equity, users may put more emphasis on Assets; and
- e) The relative volatility of the Benchmark.

## SA 520 – Analytical Procedure

## SA 530 – Audit Sampling

### Introduction

Auditor always has lack of time, so he carries test audit.

#### Definitions:

- 1) **Audit Sampling:**  
Application of Audit Procedure to less than 100% of Population.
- 2) **Anomaly**  
A misstatement or deviation that is demonstrable not representative of misstatement or deviation in population.
- 3) **Sampling risk:** Sampling risk arises from the possibility that the auditor's conclusion, based on a sample, may be different from the conclusion that would be reached if the entire population were subjected to the same audit procedure. Sampling risk can lead to two types of erroneous conclusions:
  - i) In the case of a test of controls, that controls are more effective than they actually are, or in the case of tests of details, that a material misstatement does not exist when in fact it does.
  - ii) In the case of test of controls, the controls are less effective than they actually are, or in the case of tests of details, that a material misstatement exists when in fact it does not.
- 4) **Statistical sampling:** An approach to sampling that has the following characteristics:
  - i) Random selection of the sample items; and
  - ii) The use of probability theory to evaluate sample results, including measurement of sampling risk.
- 5) **The tolerable error:** It is the maximum errors in the population that the auditor would be willing to accept and still conclude that the result from the sample has achieved the audit objective.
- 6) **The expected error:** It is the expectation of an auditor regarding errors in an audit of a FS being conducted.

### Requirement

- 1) **Sample Design, Size & Selection**
  - a) **Design:** Depends on Purpose of Audit Procedure & Characteristics of Population. **Eg:** Stratification.
  - b) **Size:** Depends on Level of Sampling Risk auditor is ready to take.
  - c) **Selection:** Such that each unit should have chance of selection.
- 2) Performing audit procedures & finding out deviations & misstatements.
- 3) Investigating nature & cause of deviations & misstatements. If it's Anomaly, obtain high degree of certainty.
- 4) Projecting misstatements.
- 5) Evaluating results of audit sampling.
- 6) **Sampling methods:**
  - a) Random – Simple or Stratified
  - b) Systematic
  - c) Haphazard
  - d) Block
  - e) Monetary unit.

## SA 705 (Revised) – Modifications to the Opinion in Independent Auditor’s Report

**Introduction and Type of Opinion**

This SA establishes three types of modified opinions, namely, a qualified opinion, an adverse opinion, and a disclaimer of opinion.

**Objective**  
**To express clearly an appropriately modified opinion on FS that is necessary when:**

- a) The **auditor concludes**, based on the audit evidence obtained, that FS as a whole are **not free from material misstatement**; or
- b) The auditor is **unable to obtain sufficient appropriate audit evidence**.

**Type of Opinion to be Expressed:**

Nature of Matter Giving Rise to the Modification	Auditor’s Judgment about the Pervasiveness of the Effects or Possible Effects on FS	
	Material but Not Pervasive	Material and Pervasive
FS are materially misstated	Qualified opinion	Adverse opinion
Inability to obtain sufficient appropriate audit evidence	Qualified opinion	Disclaimer of opinion

Pervasive effects on FS are those that, in auditor’s judgment:

- a) Are not confined to specific elements, accounts or items of FS;
- b) If so confined, represent or could represent a substantial proportion of FS; or
- c) In relation to disclosures, are fundamental to users’ understanding of FS.

**Reporting**

**Basis for Modification Paragraph** - before the opinion paragraph

**Auditor Responsibility** - Audit evidence obtained is sufficient and appropriate to provide a basis for the auditor’s modified audit opinion. (for qualified and adverse opinion)

**Qualified Opinion:**  
**except for the effects (possible effect, if unable to obtain sufficient appropriate audit evidence) of the matter(s) described in the Basis for Qualified Opinion paragraph, the financial statements.....**

**Adverse Opinion:**  
 For Fair Presentation Framework:  
 The financial statements **do not present fairly** (or give a true and fair view) in accordance with AFRF.

- a) A statement that the auditor’s responsibility is to conduct an audit of the entity’s FS in accordance with SA and to issue an auditor’s report;
- b) A statement that, because of the matter(s) described in the Basis for Disclaimer of Opinion section, the auditor was not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion; and
